

# Ahmad Al-Naib

## **DEVELOPER**

#### **ABOUT ME**

am a versatile software developer with a strong background in both backend and frontend development. My expertise spans the full stack of web and application development, allowing me to create seamless, robust, and user-friendly solutions. With a degree in Information Technology, I have a solid foundation in the principles of software engineering, which I continually build upon through hands-on experience and continuous learning.

## **PROJECTS**

www.lockport.online www.pdfly.ai

#### **EXPERIENCE**

#### LOCKTEC GMBH

## FRONT-END DEVELOPER

2021-Now

In my role as a frontend developer, I excel at creating intuitive and responsive user interfaces that prioritize user experience. I am skilled in utilizing modern frontend technologies to bring designs to life, ensuring that applications are visually appealing and functionally robust. Beyond frontend development, I have also taken on the responsibility of managing full-stack projects. For instance, I played a key role in the development and management of **Lockport.online**, where I was responsible for overseeing the entire project lifecycle. This involved coordinating both frontend and backend tasks, ensuring the integration of complex backend logic with a user-friendly frontend interface, and delivering a cohesive product that met client needs and exceeded expectations.

#### Tricome

#### BACK-END DEVELOPER

2020-2021

I specialized in designing and implementing efficient, scalable, and secure server-side solutions. My work primarily involved creating and managing APIs, developing database architectures, and ensuring the performance and security of the server-side logic. In this role, I became proficient in several backend technologies and frameworks, and I gained deep experience in handling complex data processing tasks, integrating third-party services, and optimizing system performance. I focused on building reliable, maintainable, and well-documented code that served as the backbone for various applications. My backend development experience has equipped me with the ability to tackle complex challenges, from optimizing database queries to implementing authentication and authorization systems. This foundation has been instrumental as I expanded my skill set into full-stack development, allowing me to understand and contribute to every layer of the application development process.

## EDUCATION

## UNIVERSITY OF SCIENCE & TECHNOLOGY YEMEN - SANN'A

## BACHELOR IN MANAGEMENT INFORMATION SYSTEM

2007-2011
